WINDRA BUDI LIANSYAH

winlian44@gmail.com | +62 858-9005-4473 | Jakarta, Indonesia | windraliansyah.site

SUMMARY

Computer and Network Engineering (TKJ) graduate (Final Grade: 85.13/100; SNBP Eligible Student Ranked 46th) specializing in Frontend Software Engineering, Operating System Optimization, and IT Infrastructure Support. Experienced in building interactive web applications using JavaScript (ES6+), semantic HTML5, CSS3, and REST APIs, alongside deep Windows/Linux kernel and registry tuning, enterprise server room diagnostics, and OBS Studio broadcast architecture. Certified by freeCodeCamp (JavaScript Developer) and RevoU (Software Engineering), utilizing AI-augmented workflows (Kiro, Git/GitHub) to engineer responsive, low-latency software solutions.

EDUCATION

SMK 3 Perguruan Cikini – Computer and Network Engineering (TKJ) **Jul 2022 – May 2026**

Final Grade: 85.13 / 100.00 *Jakarta, Indonesia*

- **Relevant Coursework:** Computer Networks, MikroTik Router Configuration, Cisco Topology Mapping (Packet Tracer), LAN Cable Installation & Crimping, and Hardware/Software Maintenance & Troubleshooting
- **Vocational Capstone & Assessment:** Engineered "Mochibot" as a collaborative final-year Internet of Things (IoT) hardware-software project and passed the Vocational Competency Examination (UKK) in network routing and cabling

PROJECTS

Frontend Developer | Personal Portfolio Website – Interactive Web Showcase **Oct 2026**

- Architected and deployed a responsive personal developer website (windraliansyah.site) through intensive 9-hour iterative development sessions, showcasing software engineering projects and verified credentials
- Implemented semantic HTML5 architecture and responsive CSS3 layouts to deliver an accessible user interface, cross-device compatibility, and optimized page rendering performance
- Orchestrated version control via GitHub Desktop/Web and conducted continuous UI/UX revisions aligned with modern recruitment standards

Web Developer | To-Do List & Focus Manager (Pomodoro) App – Productivity Web Application **Oct 2026**

- Designed and built an interactive web-based productivity platform integrating a Pomodoro focus timer with a dynamic task management engine
- Implemented adaptive multi-criteria task sorting algorithms (Default, A–Z, Z–A, Last Done), real-time clock synchronization, and customizable visual themes using Vanilla JavaScript (ES6+)

Web Developer | Real-Time Weather Forecasting App – Asynchronous REST API Platform **Oct 2026**

- Engineered a web-based meteorological forecasting application displaying real-time atmospheric conditions and temperature metrics based on user-queried locations
- Optimized DOM manipulation logic and asynchronous REST API response parsing for low-latency data rendering and resilient error handling

Web Developer | Interactive Drum Machine App – Web Audio & Interactive Instrument **Oct 2026**

- Developed an interactive web-based musical instrument supporting low-latency audio sample playback triggered seamlessly via both keyboard keystrokes and mouse click events
- Engineered a real-time visual state controller, dynamic audio-pad feedback, and responsive event listeners using Vanilla JavaScript (ES6+), HTML5 Audio elements, and CSS3

EXPERIENCE

Device & Remote System Optimizer – Independent / Remote Technician **Jul 2026 – Present | Remote, Jakarta**

- Completed intensive PC/laptop hardware tweaking training and transitioned from HR-guided onboarding to full operational autonomy in executing remote optimization tasks within 48 hours (Aug 2026)
- Perform deep Windows and Linux operating system optimization, custom kernel and registry tuning, and memory allocation management to improve hardware and software efficiency
- Analyze and eliminate system latency bottlenecks while delivering remote troubleshooting solutions for end-user workstations

IT Support & Infrastructure Intern (PKL) – Menara 165 **Jul 2025 – Jan 2026 | South Jakarta**

- Completed a corporate IT infrastructure internship under internal and external mentors, inspecting enterprise server room operations, high-compute server nodes (Intel Core i7 Gen 10, 128GB RAM), fiber optic links, and enterprise routers
- Resolved urgent on-site peripheral and connectivity incidents for corporate staff (including Finance department Epson printer driver and resetter utility restoration) through independent technical research under tight deadlines
- Collaborated with fellow interns to maintain office network stability, workstation readiness, and hardware diagnostics across floors

Live Streaming Specialist & Setup Technician – Freelance & Broadcast Creator **May 2023 – Jul 2026 | Jakarta**

- Designed end-to-end live broadcast architectures using OBS Studio and PRISM Live Studio, integrating multi-channel audio routing, external sound cards, real-time audio filter chains, and video capture setups
- Optimized encoder bitrate calculations, output resolution, and framerate stability for entry-to-mid-tier hardware by streamlining browser-source overlays (Saweria/SociaBuzz alerts) to eliminate frame drops

ACADEMIC & TECHNICAL ACHIEVEMENTS

SNBP National Eligible Student Award (Ranked 46th) – SMK 3 Perguruan Cikini **Jan 2026 | Jakarta, Indonesia**

- Earned top-tier academic distinction in the Computer and Network Engineering cohort (Cumulative Grade: 85.13), qualifying for the national merit-based university selection (SNBP) at Rank 46

State University Entrance Exam (UTUL) Qualifier – Universitas Negeri Jakarta (UNJ) **Jul 2026 | Jakarta, Indonesia**

- Passed the competitive independent written examination (UTUL) for the Electronics Engineering Education (*Pendidikan Teknik Elektronika*) program at UNJ before electing a strategic career gap year to pursue professional IT and software engineering

TKJ Vocational Competency Exam (UKK) & IoT Capstone – SMK 3 Perguruan Cikini **Jan – May 2026 | Jakarta, Indonesia**

- Demonstrated practical mastery in LAN cable crimping, MikroTik router configuration, Cisco Packet Tracer network mapping, and team-based IoT hardware prototyping (“Mochibot”)

TECHNICAL SKILLS, CERTIFICATIONS & LANGUAGES

Web Development:	JavaScript (ES6+), HTML5 (Semantic Markup), CSS3, DOM Manipulation, REST API Integration, Event Listeners
Tools & AI Workflow:	Git, GitHub (Desktop & Web), VS Code, Kiro AI, Google AI Pro, Prompt-Driven & Vibe Coding Workflows
System Optimization:	Windows/Linux Kernel Optimization, Registry Tuning, Memory Allocation Management, Latency Troubleshooting
Network & Hardware:	MikroTik Configuration, Cisco Packet Tracer, Network Topology Mapping, Fiber & LAN Cabling, Server & Printer Diagnostics
Broadcast & Media:	OBS Studio, PRISM Live Studio, Multi-Channel Audio Routing, Sound Card & Filter Tuning, Bitrate Encoding, CapCut
Certifications:	**JavaScript Developer Certification** (freeCodeCamp, Oct 2026) **Introduction to Software Engineering Coding Camp** (RevoU, Oct 2026)
Languages & Interests:	Indonesian (Native), English (Working Proficiency) • *Interests:* Active Skateboarder, Film Enthusiast, Hardware Tinkering
