WINDRA BUDI LIANSYAH

Jakarta, Indonesia | +62 858-9005-4473 | winlian44@gmail.com | windraliansyah.site

SUMMARY

A Computer and Network Engineering (TKJ) graduate from SMK 3 Perguruan Cikini, specializing in Software Engineering and IT Support. Skilled in modern web development (JavaScript ES6+, HTML5, CSS3), network configuration, operating system optimization, and live streaming architecture (OBS Studio). Holds industry certifications from freeCodeCamp and RevoU, and is experienced in building interactive web applications and optimizing device performance.

EDUCATION

SMK 3 Perguruan Cikini — **Computer and Network Engineering (TKJ)**

2022 - 2026 | grade: 85.13

- **Relevant Subjects:**Computer Networks, MikroTik Router Configuration, Cisco Topology Mapping (Packet Tracer), LAN Cable Installation, and Hardware/Software Maintenance & Troubleshooting.

WORK EXPERIENCE & FREELANCE

Device & Remote Optimizer| Independent Freelancer

- Performs Windows/Linux operating system optimization, custom kernel/registry tuning, and memory allocation management to improve hardware/software efficiency and performance.
- Analyze and eliminate system latency issues and provide remote troubleshooting solutions for users.

Live Streaming Specialist & Setup Technician

- Design and configure an end-to-end live broadcast architecture using OBS Studio, multi-channel audio routing, and video capture card integration.
- Optimizes bitrate calculations, output resolution, and framerate stability to produce high-quality broadcast customization without technical constraints.

PORTFOLIO PROJECTS

To-Do List & Focus Manager (Pomodoro) App— *Web Developer*

- Design an interactive web-based productivity application that integrates a Pomodoro timer with a dynamic task management system.
- Implemented adaptive task sorting features (Default, A-Z, Z-A, Last Done), real-time clock updates, and visual theme customization.

Real-Time Weather App— *Web Developer*

- Build a web-based weather forecasting application that displays current atmospheric conditions and temperature metrics based on the user's searched location.
- Optimized DOM manipulation logic and REST API response handling for fast and efficient

Interactive Drum Machine App— *Web Developer*

- Developing a web-based music instrument that supports low-latency audio sample playback via keyboard keystrokes and mouse clicks.
- Implementing a real-time visual state controller and event listener using Vanilla JavaScript.

TECHNICAL SKILLS

- **Web Languages & Programming:**JavaScript (ES6+), HTML5, CSS3, REST API, Git, GitHub
- **Network & Hardware:**Cisco Packet Tracer, MikroTik Configuration, Network Topology, LAN Cabling, Hardware Diagnostics
- **System & Optimization:**Windows/Linux Kernel Optimization, Registry Tuning, Memory Management, System Troubleshooting
- **Streaming & Multimedia:** OBS Studio, Audio Routing, Video Bitrate & Encoding Adjustment, Live Streaming Settings

CERTIFICATION & INTEREST

- **JavaScript Certification** — freeCodeCamp
- **Introduction to Software Engineering Certification**— RevoU
- **Interests:** Active Skateboarder and film enthusiast
