WINDRA BUDI LIANSYAH

winlian44@gmail.com | +62 858-9005-4473 | Jakarta, Indonesia | windraliansyah.site

SUMMARY

Computer and Network Engineering (TKJ) graduate from SMK 3 Perguruan Cikini (Final Grade: 85.13/100; 46th Ranked National SNBP Eligible Student) specializing in Frontend Web Development, Operating System Optimization, and Corporate IT/Desktop Support. Experienced in building interactive web applications using JavaScript (ES6+), semantic HTML5, CSS3, and REST API integration, alongside engineering custom Windows kernel tuning workflows, training optimization technicians, diagnosing enterprise server rooms, and architecting live broadcasting setups. Holds industry certifications from freeCodeCamp (JavaScript) and RevoU (Software Engineering), combining AI-assisted development workflows with deep hardware troubleshooting and professional client support.

EDUCATION

SMK 3 Perguruan Cikini - Computer and Network Engineering (TKJ) **Jul 2022 – May 2026**
Cumulative Final Grade: 85.13/100.00 Jakarta, Indonesia

- **Relevant Subjects:** Computer Networks, MikroTik Router Configuration, Cisco Topology Mapping (Packet Tracer), LAN Cable Installation & Crimping, Hardware/Software Maintenance & Troubleshooting, and Basic Web Programming (HTML, CSS, PHP).
- **Capstone Project & Competency Exam:** Engineered "Mochibot" as a final group Internet of Things (IoT) prototype and passed the Vocational Competency Exam (UKK) in network topology design, MikroTik/Cisco configuration, and LAN cabling.

PORTFOLIO PROJECTS

Frontend Developer | Personal Portfolio Website **Oct 2026**

- Designed and deployed a responsive personal portfolio website (windraliansyah.site) to showcase software engineering project documentation and industry certifications.
- Implemented the web interface using a full vibe code with AI methodology via Antigravity software to deliver a responsive, user-friendly, and high-performance page architecture.
- Managed source code versioning and continuous UI/UX refinements using Git and GitHub.

Web Developer | To-Do List & Focus Manager App **Oct 2026**

- Built an interactive web productivity app integrating a Pomodoro focus timer with a dynamic task management system.
- Implemented adaptive task sorting (Default, A-Z, Z-A, Completed Status), real-time clock updates, and visual theme customization using Vanilla JavaScript (ES6+).

Web Developer | Real-Time Weather Forecasting App **Oct 2026**

- Developed a web weather application displaying real-time atmospheric conditions, humidity, and temperature metrics based on user location queries.
- Optimized asynchronous DOM manipulation logic and REST API response handling for fast, reliable data rendering.

Web Developer | Interactive Drum Machine App **Oct 2026**

- Engineered a web-based musical instrument supporting low-latency audio sample playback triggered via keyboard keystrokes and mouse clicks.
- Built a real-time visual state controller, dynamic audio pad feedback, and event listener management using Vanilla JavaScript (ES6+), HTML5 Audio, and CSS3.

WORK EXPERIENCE

Device & Remote System Optimizer & Technical Trainer **Jul 2026 – Present | Remote, Jakarta**

- Appointed as a **Device Optimization Trainer (Nov 2026)** to mentor and onboard technicians in standardized PC/laptop tuning procedures after achieving full operational autonomy within 48 hours of initial onboarding.
- Engineered a streamlined, time-efficient optimization workflow (Sep 2026) covering advanced Windows kernel/registry tuning and memory allocation management to maximize hardware/software performance and reduce turnaround time.
- Diagnosed and resolved system latency bottlenecks and driver conflicts via remote troubleshooting while maintaining high professional communication standards when handling demanding clients.

IT Support & Infrastructure Intern (PKL) - Menara 165 **Jul 2025 – Sep 2025 | South Jakarta**

- Collaborated with senior IT and Software Engineers during a critical building-wide network outage to inspect multi-floor server rooms, audit physical fiber optic ports, and verify server connectivity indicators under the guidance of the Network Infrastructure lead.
- Executed cross-departmental hardware upgrades and network installations, including PC disassembly for NVIDIA GPU replacements, driver configurations for the Design (DKV) division, and independent RJ45 LAN cable crimping.
- Resolved urgent peripheral downtime in the Finance department by independently researching, diagnosing, and executing Epson printer driver and resetter recovery procedures under tight user deadlines.

Live Streaming Specialist & Broadcast Technician **May 2023 – Jul 2026 | Jakarta**

- Designed and configured end-to-end live broadcast architectures using OBS Studio and PRISM Live Studio, integrating multi-channel audio routing, external sound cards, custom audio processing filters, and video capture cards.
- Optimized bitrate calculations, output resolutions, and browser source efficiency to maintain stable framerates across varying hardware specifications.

ACADEMIC & TECHNICAL ACHIEVEMENTS

National SNBP Eligible Student Award (Rank 46) - SMK 3 Perguruan Cikini **Jan 2026 | Jakarta, Indonesia**

- Achieved top academic standing with an 85.13/100 cumulative grade in Computer and Network Engineering, ranking 46th among eligible students for the national merit-based university selection (SNBP).

Passed Independent Entrance Exam (UTUL) - Universitas Negeri Jakarta (UNJ) **Jul 2026 | Jakarta, Indonesia**

- Successfully passed the competitive university entrance examination for the Bachelor of Electronics Engineering Education program at Universitas Negeri Jakarta.

Vocational Competency Examination (UKK) TKJ - SMK 3 Perguruan Cikini **May 2026 | Jakarta, Indonesia**

- Certified proficient in practical LAN cable installation and crimping, MikroTik router configuration, and Cisco Packet Tracer network topology simulation.

TECHNICAL SKILLS

Frontend Web Development: JavaScript, Semantic HTML5, CSS3, Responsive Web Design, DOM Manipulation, REST API Integration

Tools & AI Workflows: Git, GitHub (Desktop & Web), VS Code, AI-Assisted Development (Antigravity, Kiro AI, Gemini), Modular Code Architecture

Operating Systems & Optimization: Windows Kernel Optimization, Registry Tuning, Memory Allocation Management, System Latency Diagnostics, Technical Training

Networking & Desktop Support: MikroTik Configuration, Cisco Packet Tracer, Network Topology Mapping, LAN RJ45 Cabling, GPU/Hardware Installation

Broadcasting & Multimedia: OBS Studio, Multi-Channel Audio Routing, Sound Card & Audio Filter Configuration, Video Bitrate & Encoding, CapCut

CERTIFICATIONS

JavaScript Certification - freeCodeCamp (Oct 2026): Validates comprehensive mastery of programming logic, data structures, and application development processes using JavaScript.

Introduction to Software Engineering - RevoU (Oct 2026): Completed intensive software engineering training focusing on modern web fundamentals, Git collaboration, and mini-project delivery.
